

ARGUS Zone™

Formerly RealPulse.net

The Real Estate Industry's First Global Data Exchange

As the market leading software provider for the commercial real estate industry, ARGUS Software has accumulated a wide and powerful user network. ARGUS Zone™ provides its users the ability to tap into that network by offering the real estate industry's first global data exchange for the commercial real estate industry.

The services provided over this data exchange facilitate secured file sharing, meeting organization, industry networking, and product support.

Benefits

Participation in the largest real estate community in the world—there are over 15,000 users across the commercial real estate industry worldwide that have access to ARGUS Zone. Join our forums and interact with these users about a wide variety of real estate industry specific issues.

ARGUS Zone provides enhanced communication and workflow management for diligence and other processes. Secure access to data rooms allows for better version control of shared documents, access tracking, and easy transmission of documents to as many guest users as you wish.

ARGUS Zone also provides access to a large knowledgebase for any product related questions - ARGUS Software is maintaining a sizeable and growing library of product questions, tips, tricks, and fixes that will be available at your fingertips.

ARGUS Zone users will be able to:

- Market commercial properties
- Lead steering committees
- Retrieve and post industry reporting templates (appraisal reports, executive summaries)
- Submit documents in a secured environment for clients and other stakeholders
- Discuss current trends affecting the industry
- Communicate with constituents in foreign markets

Future functionality may include online access to ARGUS Software's high quality aggregated data and forecasting, enhanced communication tools and searchable database of industry participants.
